cloud-init summit 2023

Wednesday, 9 August 2023 - Thursday, 10 August 2023

Microsoft Redmond Campus Bldg 40

Program session tracks

cloud-init summit: main track

Presentation, discussion topics or lightning talks/demos to schedule during the cloud-init summit.

The topics will typically be of general interest to cloud-init developers, cloud partners and/or cloud-init community.

Expect the following types of sessions:
5-20 minute slide-set driven Presentations for: retrospect; planning; feature/design deep dives or process improvements; status reports from distribution or Cloud partners to showcase pain points; improvements to be had broadly in cloud-init upstream
5-20 minute break-out discussion sessions on a particular topic of interest: networking; storage; support; tooling; dispersed CI/testing; or specific semi-private partner support
5-10 minute demo or lightning talks of significance to cloud-init development, consumer use-cases, support policy or even competitive product analysis.
