Two parts in my talk

1. My creative journey & open source community
2. Ubuntu Studio for creative newcomers

I like drawing since I was kid.

(Even my drawings are bad. Hehe)

2006 – Got to know vector & raster graphic software

Someone introduced me to the proprietary ones.

2009 – Me & Shiplt

You know what are these?

I'm one of those millions who has requested some CDs from Shiplt Programme.

*BTW, you know about CD, right? It's compact discs!

Keeping Ubuntu CDs available

Jane Silber

on 21 October 2009

 This article is more than 14 years old.

The Shipt program has been at the core of the Ubuntu project since its inception. The goal was to make sure that there are no restrictions, as far as was possible, to people having access to Ubuntu. In the last five years we have shipped millions of CDs and seen Ubuntu's popularity and reach grow in ways that would be impossible without Shipt.

And that aim continues. We need to make Ubuntu available to as many people who need it, particularly those for whom the download options are limited. The goal has not been to supply a CD to every Ubuntu user of every version of Ubuntu. Remember, one of the coolest things about Ubuntu is the way you can upgrade from one version of Ubuntu to another – without the need for a CD!

Shipt comes to an end

It's with some regret that we are announcing the end of the Shipt Programme and the CD distributor programme. When we started Shipt in 2005 broadband was still a marketing promise even in the most connected parts of the most developed nations. We knew that this represented a significant stumbling block to the adoption of a new technology like Ubuntu. So we invested in making the CDs free and freely delivered to anywhere in the world. Since then we have shipped millions of CDs to every country in the world and brought Ubuntu into the lives of millions of individuals, we hope making them a little better.

Technology moves on and as we look at ways to spread Ubuntu further, a CD distribution programme, especially one of that size and delivered in that way, makes less sense. We have been slowly easing back the programme over the last two years to limit the number of CDs per person and the number of times a person could apply for a CD. But for Ubuntu 11.04 you will no longer be able to go to our website and apply for a free CD.
